## Your Safety is Our Primary Concern

Globally, 49% of deaths from traffic crashes occur among vulnerable road users, motorcyclists. Approximately, a quarter of those killed are motorcyclists. The use of helmets is effective, but the most time you spend waiting the most chance you have to face serious injuries.

### MOTORCYCLE ACCIDENT

- Helmets saved an estimated **1,859 lives** in 2016.
- If all motorcyclists would have worn helmets in 2016, **802 more** could have been saved.
- Helmets reduce the risk of death by **37%**
- Helmets reduce the risk of head injury by **69%**

## Your Safety is Our Primary Concern

Death on the road

Hospitalized

Slight injured

more risky

## Time can save life

Today people die waiting for emergency service.

In case of injury on rural roads, it can be difficult to react and contact rescue services.

We aim to save your life by contacting automatically emergency services.
